Project 3

Creating a website for Bartlett Venue

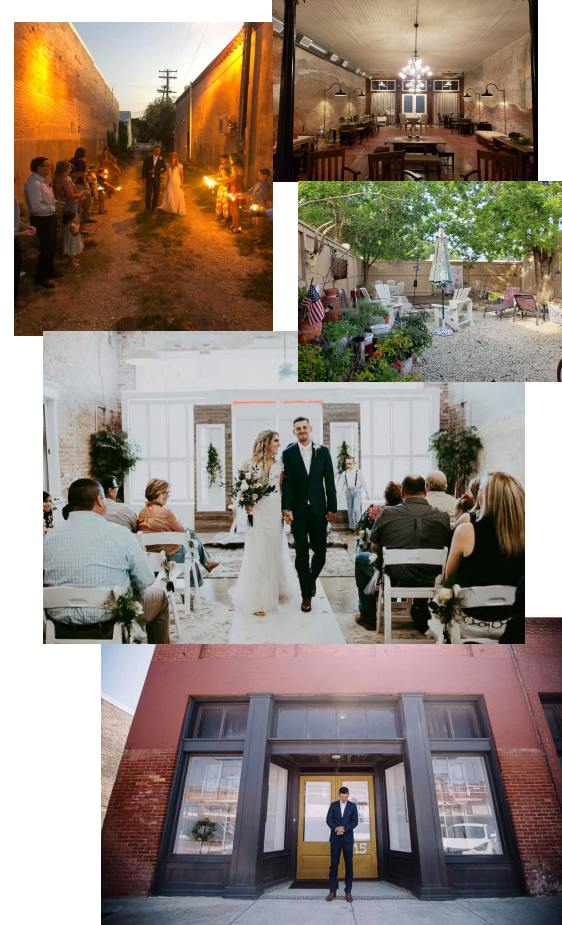

Wireframe Demo

<https://xd.adobe.com/view/8ee2a4d6-8270-43d1-a5a3-aae92f6b7929-dbb1/?fullscreen> (only Pesky Rabbit has links)

Created in XD by Adobe

Home Page:

- Hero carousel landing w/sticky navbar
- Scroll to CTA Get Started button (Calendar)
- 3 venue options (link to Venue Rental page)
- Testimonial - scroll design
- Gallery - CTA "Book a Tour" (Contact Us)
- Map (MVP static, link to external)
- History (About Us)
- Contact page (same as Contact Us)
- Sticky footer w/links possibly to specifics

Challenges

Back End Challenges using MERN Stack

- **Calendar**
Most Challenging - show availability with "blackout dates"
- **Data Storage**
Store venue request input data
- **Email**
Generate email once venue request is booked

Plans

Front End Challenges

- **Volume of work**
Lots of images, content, layout
- **React CSS**
Following wireframe layout
- **Images**
Sizing properly, resolution

Repo set-up with Project Files started

Challenge to develop
TDD with hopes of
minimizing code sync

Tip

Test Driven Design helps eliminate the **unexpected**.

While TDD will help with team communications, this group elected to manage revs, expectations using MSFT Teams

Ready to begin! Planning 1st.

(Assigned deliverable leads)

Conner - PRP

Daniel- Meeting Notes

Stephen - README.md

Vanessa - Proposal

Diane - Wireframe

All - Flow Chart (team effort)

Tip

Remember. If something sounds like common sense, people will ignore it.

Highlight what is unexpected about your topic.

Tip

Group 5 plans to meet before class to finalize planning, divide tasks once project is defined into features

All will handle front and back end challenges

Content.

In general...fees and some content for Project 3 delivery may be fill data

Tip

Will provide images of the historic town, creative images from movies shot on-site, and murals to help tell this **story**, ideally bringing business to the venue.

Approved?

Asking for permission to lock this concept in order to continue planning process and move into execution with this TDD full stack project.
